A Study on the Impact of Digital Entrepreneurship on Business with Special Reference to Coimbatore City

Durgalakshmi S¹, Dr. R. Francina Pracila Mary²

¹Research Scholar, VLB Janakiammal College of Arts and Science, Kovaipudur Coimbatore, Tamilnadu

²Assistant Professor of Commerce (CS&IT), VLB Janakiammal College of Arts and Science, Kovaipudur Coimbatore, Tamilnadu

Abstract: *This study explores the transformative effects of digital entrepreneurship on business operations. As technological advancements continue to redefine traditional business models, digital entrepreneurs are leveraging platforms, digital tools, and innovative solutions to create new economic opportunities and drive societal change. This study explores the ways in which digital entrepreneurship drives innovation, improves business efficiency, and supports economic growth. Additionally, the study investigates the social implications, including shifts in employment patterns, changes in consumer behavior, and access to opportunities. Through quantitative analysis, the study identifies key drivers of success in digital entrepreneurship, challenges faced by entrepreneurs, and the role of digital ecosystems in shaping future business landscapes. The findings offer valuable insights for policymakers, business leaders, and emerging entrepreneurs seeking to navigate the evolving digital economy.*

Keywords: *Digitalization, Entrepreneurial Growth, Digital Innovation, Digital Marketing*

I. INTRODUCTION

In the past few decades, digital entrepreneurship has emerged as a powerful catalyst for innovation, economic development, and societal transformation. The rapid advancement of digital technologies, including the internet, mobile platforms, and e-commerce, has opened up new avenues for entrepreneurs to launch, manage, and scale businesses with unprecedented ease and reach. This shift is not only transforming business practices but also reshaping social dynamics across the globe. Digital entrepreneurship, through its disruptive potential, is enabling individuals and organizations to operate outside traditional constraints, thereby creating novel business models and contributing to the socio-economic progress of regions.

Coimbatore, one of Tamil Nadu's fastest-growing cities, has experienced a substantial surge in digital entrepreneurs in recent years. The city is well-known for its thriving industrial sectors, particularly textiles, engineering, and manufacturing. Coimbatore has also become a burgeoning hub for innovation, startups, and digital business ventures. This study aims to explore the impact of digital entrepreneurship on business growth and societal development in Coimbatore, focusing on how local entrepreneurs are adapting to and driving change through digital tools and platforms.

The study delves into the opportunities and challenges faced by digital entrepreneurs in Coimbatore, examining the ways in which digital businesses are contributing to the local economy, creating jobs, and altering traditional business structures. By analyzing these factors, this study seeks to provide valuable insights into the role of digital entrepreneurship in shaping the future business landscape of Coimbatore.

II. REVIEW OF LITERATURE

In Nambisan, S. (2017) "Digital entrepreneurship: Toward a digital transformation framework", the author presents a comprehensive framework to understand the role of digital entrepreneurship in the context of organizational and societal transformation. Nambisan (2017) explores how digital entrepreneurship is not merely about creating new ventures through digital technologies, but about fundamentally reshaping industries, economies, and business practices in response to advancements in digital technology.

The paper "Digital Entrepreneurship in Coimbatore: Challenges and Opportunities" by Ramkumar, R., & Aravind, K. (2021), published in the South Indian Journal of Business Studies, explores the landscape of digital entrepreneurship in Coimbatore, a major industrial city in Tamil Nadu, India. The authors analyze the various challenges and opportunities faced by digital entrepreneurs in Coimbatore, offering insights into how local businesses are adapting to the digital economy and navigating both regional and global markets.

While Coimbatore offers significant potential for digital entrepreneurship, the city still faces several challenges, particularly in terms of infrastructure, funding, and skill development.

The paper "Digital Skills Development and Entrepreneurship in Coimbatore: A Case Study" by Vijayan, S. (2020), published in the Indian Journal of Innovation, explores the role of digital skills in fostering entrepreneurship in Coimbatore, a major city in Tamil Nadu, India. The study focuses on the importance of digital skills development for entrepreneurs in Coimbatore and how it influences their ability to succeed in the increasingly digital-driven economy. Through a case study approach, Vijayan examines local entrepreneurial ventures and their experiences with digital skills acquisition and utilization.

Vijayan highlights how the entrepreneurs are leveraging digital tools to enhance their business operations, optimize customer engagement, and expand their market reach. The case studies provide insights into the role of digital skills in the entrepreneurs' journeys, illustrating how those with higher levels of digital literacy have been able to successfully adopt technology and scale their businesses. The paper shows that entrepreneurs with a strong digital skill set can innovate more effectively and navigate the complexities of digital marketing, online customer support, and e-commerce.

III. OBJECTIVES

- 1) To evaluate how digital entrepreneurship influences business performance.
- 2) To explore the challenges encountered by digital entrepreneurs.

IV. HYPOTHESIS

H1: Digital entrepreneurship has a positive impact on the business performance of companies in Coimbatore.

H0: There is no considerable connection between digital entrepreneurship and business performance in Coimbatore.

V. LIMITATIONS

- 1) The sample size may not fully represent the entire population of digital entrepreneurs in Coimbatore.
- 2) Rapid technological advancements may cause the findings to become outdated over time.
- 3) The study focuses on digital skills and infrastructure, potentially overlooking cultural and social factors.
- 4) The societal impact of digital entrepreneurship is difficult to quantify and assess accurately.

VI. TOOLS USED

- 1) Percentage Calculation: This tool will be used to measure and represent the proportion of specific responses or outcomes, such as the percentage of entrepreneurs in Coimbatore who have adopted digital tools or the percentage increase in revenue due to digital transformation.
- 2) Chi- Square Analysis: To determine the association between the type of digital tools adopted (e-commerce, social media marketing, mobile apps) and the business performance (growth in revenue, market reach, customer engagement)

Table 1: Age Distribution of Respondents

Age Group	Number of Respondents (n=50)	Percentage (%)
18-27 years	12	24
28-37 years	10	20
38-47 years	15	30
48-50 years	8	16
Above 50 years	5	10
Total	50	100

Table 1 reveals presents a clear breakdown of the respondents by age group, with a 10-year frequency and their percentages out of 50 total respondents. The table shows 30% of the entrepreneurs are from age group 38 to 47 of age.

Table 2: Digital Tool Adoption Among Entrepreneurs

Digital Entrepreneurship Adoption	Number of Respondents (n=50)	Percentage
Adopted Digital Tools	35	70
Did Not Adopt Digital Tools	15	30
Total	50	100

This table helps present a clear breakdown of the entrepreneurs who have adopted and those who have not adopted digital tools in your study. The table explains most (70%) of the entrepreneurs have adopted Digital Tools.

Table 3: Impact of Digital Entrepreneurship on Business Performance

Impact on Business Performance	Number of Respondents (n=50)	Percentage (%)
Increased Revenue	10	20
Improved Market Reach	15	30
Enhanced Customer Engagement	20	40
No Impact	5	10
Total	50	100

The table represents the impact of digital tools usage in businesses. This clearly shows there is a visible increase in the sales and revenue of the business. The revenue has been increased by 20% with a 40% increase in customer engagement. Since the calculated Chi-Square value (10.0) exceeds the critical value (7.815), we reject the null hypothesis and conclude digital tools have a great impact in businesses.

VII. FINDINGS

- 1) Implementing Digital Tools in business does helps in customer engagement and thus increasing revenue.
- 2) Most of the businesses have been implementing Digitalization in their businesses.
- 3) Digital entrepreneurship has the potential to enhance customer engagement and market reach, its ability to drive revenue growth appears to be more limited and may depend on factors such as business type, digital literacy, and the scale of digital adoption.
- 4) Entrepreneurs who reported no impact could be facing challenges such as lack of knowledge, limited access to technology, or inadequate resources to effectively implement digital solutions.

VIII. SUGGESTIONS

A. Gender and Demographic Factors

Explore how gender, age, and other demographic factors influence the adoption of digital entrepreneurship.

B. In-depth Customer Analysis

Future studies could analyze the customer perspective on digital entrepreneurship, focusing on how digital tools affect customer trust, satisfaction, and loyalty in Coimbatore.

C. Role of Digital Government Support

Future researchers could investigate how government initiatives and policies (such as subsidies, tax breaks, and digital literacy programs) impact the adoption and success of digital entrepreneurship.

D. Examine Sector-Specific Impacts

Explore the impacts of various sectors in Coimbatore. The current study indicates that the benefits of digital adoption vary across industries. Researchers could focus on understanding sector-specific challenges and opportunities, offering deeper insights into how digital tools influence business operations and customer interactions within distinct sectors.

IX. CONCLUSION

The study on the impact of digital entrepreneurship on business and society in Coimbatore has provided valuable insights into the transformative role of digital tools in the local business ecosystem. Digital entrepreneurship, characterized by the adoption of online platforms, social media, e-commerce, and other digital technologies, is gradually reshaping the way businesses operate and engage with customers in the city.
