Absolute Liability Merits Demerits – A Critical Analysis

Aman Singla¹, Mrs. K. Shanthi²

Division: C: Roll No. : 21010324011 Class: BBA.LL.B. Symbiosis Law School, Hyderabad
Guide, Assistant Professor at Symbiosis Law School, Hyderabad

CERTIFICATE

The Project titled 'Absolute liability merits demerits- A critical analysis: submitted to the Symbiosis Law School, Hyderabad as part of Internal assessment on law of torts is based on my original work carried out under the guidance of Mrs k shanti , Assistant Professor at Symbiosis Law School, Hyderabad The research work has not been submitted elsewhere for the award of any degree. The material borrowed from other sources and incorporated in the thesis has been duly acknowledged. I understand that I myself could be held responsible and accountable for plagiarism, if any, detected later on.

Signature of the candidate

Date: 31.12.2021.

ACKNOWLEDGEMENT

I would like to express my sincere gratitude and indebtedness to Mrs. k shanti for her enlightening lectures on law of torts and guiding me the path towards gaining knowledge on how to perform an effective research. Her instructions served as a major contribution towards completing this project.

I would like to thank the Library Staff of Symbiosis Law School, Hyderabad, for their co-operation which was necessary while availing the services of enormous encyclopedic library.

I would also like to thank my friends, batch mates and seniors who inspired, helped and guided me in making this project. I am grateful to these above mentioned for their incredible guidance and support.

Abstract: *In numerous circumstances, an individual is found liable for an act that he could not have performed, or for which he made all reasonable efforts to avoid causing any harm, yet was nevertheless held liable. This is a situation in which an individual is held liable notwithstanding the absence of fault; these are strict liability rules. The legislation recognises this provision based on the 'no-fault responsibility' criteria. These rules are based on case law. This clause was handed down in the case of Rylands vs. Fletcher, and hence this rule is commonly referred to as the "Rule in Rylands vs. Fletcher," however the rule of absolute A number of exceptions to this rule were established, and responsibility was established for them. The Supreme Court of India decided in M.C. Mehta vs. Union of India that the defendant is responsible for the act and that the offence should not be disputed. In tort law, the phrases strict liability and absolute liability must be defined. These two have a similar meaning, however there are some variances. With limited limitations, strict responsibility dictates that one must be accountable for the harm caused by the use of dangerous objects, escape, and unnatural usage of the soil. Without a doubt, absolute responsibility is a larger notion of this obligation. It argues that an individual is accountable for harm even if he has acquired control of his land. He cannot raise any defences, as stated in the case of strict liability.*

Cauterization

H0: *The norm of absolute responsibility liability has no exceptions.*

H1: *There are certain exceptions to the strict liability rule."*

Industries and businesses that utilise or manufacture hazardous or intrinsically dangerous chemicals in their facilities are the main targets of the Absolute Liability rule's application. Because these industries had not exist previously, the Strict Liability rule could be applied to them on a broad scale. These industries now take advantage of the country's riches while also posing a threat to inhabitants. This Absolute Liability law requires companies to accept full and unqualified responsibility for their harms, putting people' and society's health and well-being first.

I. INTRODUCTION

In its maximum fundamental form, absolute obligation refers to no-fault legal responsibility, wherein the perpetrator isn't always granted any of the restrictions protected within the strict legal responsibility rule. Absolute obligation is a greater intense form of strict legal responsibility that turned into hooked up in *Rylands v. Fletcher*¹ and known through the Supreme Court of India in *M. C. Mehta v. Union of India*². This problem arose following an aftermarket fueloline leak on the Shriram Food and Fertilizers Ltd. facility in Delhi. This fueloline leak came about rapidly after the catastrophic Bhopal fueloline leak, inflicting considerable problem in Delhi. Bhagwati CJ. turned into a trailblazer on this field. He did now no longer observe the guideline of thumb set in *Rylands v. Fletcher*⁴ at the important purpose that the thoughts hooked up in that choice aren't steady with modern jurisprudential thought. In modern present day business society, wherein unsafe or inherently risky industries are required to perform improvement programmes, Justice Bhagwati additionally said that the guideline of thumb of strict legal responsibility turned into advanced within the nineteenth century, while nature business tendencies had been at their infancy. In modern present day business society, wherein unsafe or inherently risky industries are required to perform improvement programmes, this rule is now no longer relevant. Also, this law, which turned into advanced within the context of a totally unique social and financial framework, must now no longer be taken into consideration an impediment. There is a clean comparison among strict and permissive The Supreme Court hooked up absolutely the obligation rule in *M.C. Mehta v. Union of India*, mentioning 4 key points: To start with, best the ones companies engaged in unsafe or intrinsically risky sports might be held accountable; which means different industries now no longer protected within the above listing might be issue to the Strict Liability Rule. Second, escaping a damaging item from one's land isn't always required, which means that the law will observe to each the ones harmed inner and past the premises. Third This rule does now no longer have an exception, not like the Strict Liability rule. Four, the quantity of damages is decided through the scale and economic electricity of the company. The organization should be held to be below an duty to offer that the unsafe or inherently risky pastime wherein it's miles engaged is performed with the very best requirements of safety, and if any damage takes place because of such pastime, the organization should be honestly susceptible to make amends for such damage, and it must be no solution to the organization to mention that it had taken all affordable care and that the damage happened with out its fault.

II. LITERATURE REVIEW

In Nigeria, Ezike, 2011² investigates inadequacies in not unusualplace regulation treatments and rules that save you equitable justice in conditions of environmental harm. The not unusualplace regulation of harm treatments and environmental legal responsibility rules have been examined. There is likewise a dialogue of not unusualplace regulation and federal strict legal responsibility laws. It has been validated that the not unusualplace regulation treatment is useless in securing good enough environmental compensation. The truth that strict obligation isn't appropriately demonstrated within the relevant statutes while polluters keep to keep away from accountability." " The validity of strict obligation in crook regulation, in addition to the query of the fee of strict legal responsibility in crook regulation can be associated however aren't the same (Prendergast, 2011)³. The trouble of the constitutionality of strict obligation in Ireland is handled on this paper. It critiques the problem of which constitutional standards are infringed via way of means of strict crook legal responsibility. The response proposed is that in an incredible situation the presumption of legitimacy may be violated, however in addition, the unconstitutionality of strict obligation in line with se within the regulation of Ireland is tough to understand. The first segment of this paper analyses an Irish case objectively, mentioning that the judgement does now no longer show incompatibility with the Constitution. The 2d component examines viable procedural bases on which strict obligation ought to be contained; considers the advice that the presumption of innocence be appeared as containment of strict legal responsibility and underlines the guideline of thumb of regulation as an important manage of criminalization." " Most students query the application of absolute legal responsibility, which makes it beside the point whether or not an infringement defendant copied from the patentee or independently invented the patented invention (Merges, 2014)⁴. This take a look at in part defends patent regulation's absolute legal responsibility rule.

A. Reseach Question

- 1) Is Absolute Liability applicable in the Indian Scenario?
- 2) What was the need to introduce Absolute Liability?
- 3) What is the relevance for the rule of Absolute Liability?
- 4) How is Absolute Liability different from Strict Liability?

B. Objectives of the study

- 1) To understand the concept of strict and absolute liability through discussion of landmark judgments.
- 2) To study the rules of strict and absolute liability in detail, i.e., in terms of essentials, exceptions, defences available, etc.”

III. CONTENT TO BE EXPLAINED

Rapidly accelerating commercial improvement has delivered with it a myriad of virulent fitness problems. Enterprises are civil additives with rights and obligations toward the general public and are accountable now no longer to damage human fitness and nature. They have an "absolute non-delegable obligation" to the community. In *Hoy v. Miller*¹¹, Justice Golden expounded the time period Absolute Liability with fantastic expertise, "absolute legal responsibility is a legal responsibility with out fault – a legal responsibility for which there's no excuse."

The Principle of Absolute Liability turned into formulated and verbalised often in *M. C. Mehta v. Union of India* in 1986, and later in Bhopal Gas Tragedy case. Absolute Liability is a tortuous component. This precept enforces the obligation of care owed to the general public with the aid of using groups that cope with dangerous factors. Any organization engaged withinside the manufacturing and use of dangerous materials have to make certain that no damage is completed to that area's residents. If someone is harmed, the corporation will be responsible, and no defence or high-quality occasions may also relieve them of such legal responsibility. Those responsible can't use defence along with negligence, fault, act of God, blunders to searching for an exempt fame from repayment and legal responsibility.

Hazardous additives are the stipulations for the implementation of Absolute Liability. The Courts can handiest practice this precept if an detail dangerous to one's fitness and the surroundings places existence at risk. Examples of dangerous factors consist of poisonous gas, vibrations, explosive materials, etc. However, withinside the case of Absolute Liability 'get away' as an detail isn't necessary. Unlike Strict Liability, get away of the detail isn't required; the guideline of thumb will practice to the ones injured in and out of doors the premise. Additionally, Strict Liability's precept includes land to be of non-natural; however, that isn't the case with Absolute Liability. Moreover, the wide variety of deaths is beside the point at the same time as thinking about the volume of Liability and repayment to be paid **DISTINCTION BETWEEN STRICT AND ABSOLUTE LIABILITY AS MENTIONED BY THE SUPREME COURT IN THE CASE OF M. C. MEHTA V UNION OF INDIA**¹² • In the guideline of thumb of *Rylands v. Fletcher* thirteen failure to cowl instances of harm to individuals withinside the premises of the regulation calls for an get away from an object's premises, which reasons harm. The new rule does now no longer permit the sort of differentiation to be made among individuals withinside the premises wherein the corporation operates and individuals out of doors the property. The component that reasons harm to the premises isn't a prerequisite for enforcing the guideline of thumb. • Additionally, the guideline of thumb in *Rylands v. Fletcher*¹⁴ although strict and now no longer reliant at the defendant's misdoing, the present day rule isn't absolute, as it's far difficulty to numerous exceptions.

However, the Mehta case's new rule isn't handiest strict however absolute and is difficulty to no exception at all. • Another important factor of difference among the 2 regulations is withinside the be counted of award of damages. Damages awardable wherein the guideline of thumb in *Rylands v. Fletcher*¹⁵ is relevant. However, it will be normal or countervailing in instances wherein the relevant regulation is laid down in M.C. Mehta's case; the Court may also grant exemplary damages and the larger and more prosperous the enterprise the greater the amount of compensation to be paid

IV. NEED FOR ABSOLUTE LIABILITY

(A) High charge of business increase India is one of the quickest growing economies. The vintage rule become set in a technology wherein there has been no extraordinary increase of industries and economies and as a result isn't always suitable for the contemporary-day scenario.

(B) Varying use of land When *Rylands v. Fletcher*'s rule got here into place, it become now no longer not unusualplace to shop water in a huge tank for irrigation functions. In England, the rural practices have been different, and it wasn't a rustic that trusted agricultural activity. On the opposite hand, India is a rustic wherein even today, agriculture is the number one supply of profits for plenty residents and as a result storing water in a tank for such functions appears normal. Such differing practices additionally make this rule beside the point for the Indian system.

(C) Applicability of rule has emerge as redundant withinside the cutting-edge technology The vintage rule become formulated nearly one hundred and fifty years ago, and this rule can not stay relevant even now, and consequently a want for this type of rule rose.

V. EVOLUTION OF ABSOLUTE LIABILITY IN INDIA

Sir Fredrick Pollock, in 1886 thru his draft of the Indian Civil Wrongs Bill, Section 68, proposed a provision, which said that: "someone maintaining risky matters is sure to take all fairly manageable care to save you harm, and is accountable as for negligence to make repayment for harm". This bill, however, wasn't codified and consequently failed to see the mild of day. In 1982, the Andhra Pradesh High Court withinside the case of *K. Nagireddi v. Union Of India* 16emphasised the want to modify the vintage precept and said its view that "In India, the overall rule of *Ryland v. Fletcher*¹⁷ is accepted, alevn though the precept is wanted to be changed in its application. to the Indian consideration". Finally, in 1987 the Supreme Court enunciated the precept of 'Absolute Liability' withinside the *MC Mehta v. Union of India* 18case in which there has been a leak of Oleum fueloline from the Shriram Foods Fertilisers Industries in Delhi, belonging to Delhi Cloth Mill Ltd. In this leakage, one recommend had died, and numerous others have been affected. The enterprise became set in a densely populated area, for this reason posing excessive danger and panic many of the humans thinking about that the incident had befell withinside the Bhopal Gas Tragedy wake. This became while the Supreme Court had determined it became time for a brand new rule to return back into area and held: "We are of the view that an employer, that is engaged in risky or inherently risky enterprise which poses a capability hazard to the fitness and protection of the folks running withinside the manufacturing facility and living withinside the surrounding regions owes an Absolute and non-delegatable responsibility to the network to make sure that no damage effects to each person due to risky or inherently risky pastime which it has undertaken. The employer ought to be held to be below an duty to offer that the risky or inherently risky pastime wherein it's miles engaged ought to be carried out with the very best requirements of protection and if any damage effects due to such pastime the employer ought to be really at risk of catch up on such damage and it have to be no solution to employer to mention that it has taken all affordable care and that the damage befell with none negligence on its component The Supreme Court additionally held that the degree of repayment have to be proportionate to the enterprise's length to have a deterrant impact and make sure that this kind of scenario does now no longer get up withinside the destiny. This precept became then implemented withinside the Bhopal Gas Tragedy¹⁹ case, that is taken into consideration the world's worst disaster. With the growing range of petitions being filed regarding the incident, the authorities promulgated the Bhopal Gas Leak Disaster (Processing of Claims) Act, 1985 (the Bhopal Act) on 29 March 1985. This Act gave the authorities the proper to behave as 'parens patrie' on behalf of these affected in topics regarding India's tragedy and overseas. Absolute Liability became then invoked on this case. However, the Union Carbide Corporation distanced itself from the Union Carbide India Limited, which became the Indian subsidiary to get away the liabilities. The damages to be recovered became set at three.three billion USD. However, the Government of India and the Union Carbide Corporation (UCC) reached a agreement. The UCC ended up paying best 470 million USD, kind of best 15% of the authentic sum. The phrases of the agreement have been such that it restricted the Liability of UCC for all destiny petitions, the existing crook and civil complaints towards them have been quashed. This step through the authorities became hugely criticised due to the fact the quantity received as repayment became woefully insufficient. The Liability of the UCC became confined to most effective a sure extent. The judges in *Indian Council for Environmental Legal Action v. Union of India* 20 felt that absolute legal responsibility became now no longer most effective binding on Indian courts however additionally the maximum suitable one, and that they directed the defendant to atone for the damage due to them to the villagers withinside the affected area, the soil, and the underground water.. Hence, they may be certain to take all essential measures to cast off the sludge and different pollution mendacity withinside the affected area. Absolute Liability began out gambling a sizeable function in Environmental Law because the Court in *Vellore Citizens' Welfare Forum vs. Union of India* 21interpreted the that means of the that means of the Polluter Pays Principle because the absolute legal responsibility for environmental harm extends to reimburse the sufferers of pollutants and the fee of re-setting up ecological harm The Court additionally held a comparable view in *M. C. Mehta vs Kamal Nath & Ors*²² wherein the Court held that polluting the surroundings became taken into consideration a civil incorrect performed towards the society. Absolute Liability became to start with used most effective in instances concerning public risk/disaster. However, with the alternate of Liability, courts began out making use of this idea on every occasion and anyplace well being of any character is concerned. The courts also can approve absolute Liability in case of a unmarried loss of life with none mass harm of assets or pollutants of the surroundings. This became held withinside the case of *Klaus Mittelbachert v. East India Hotels Ltd.*²³ , wherein the plaintiff, who became a German co-pilot, sustained severe accidents following his plunge into the pool of the fivestar restaurant. After inspection, it became determined that the pool had a mistaken nature and additionally an insufficient quantity of water. The pilot became paralysed with the aid of using the accidents ensuing in his loss of life after thirteen years of the crash. The Court held that five-famous person accommodations that fee sizeable sums owe a excessive stage of care to their guests. This rendered the resort answerable for damages to the plaintiff

The precept of Absolute Liability genuinely has helped plenty of humans advantage their rights again and declare repayment for harm down with the aid of using making the humans concerned Absolutely Liable but there were instances wherein Absolute Liability became now no longer carried out irrespective of all conditions being fulfilled. The current Vizag Gas leak case 25 is an instance of such situation. Here, the LG Polymers enterprise in Vishakapatnam witnessed the leak of Styrene Gas leaving 12 humans and 32 farm animals dead. The State Government then took Suo Moto cognisance of the case but the National Green Tribunal held that the LG Polymers became Strictly Liable. Experts as compared this incident with the Bhopal Gas Tragedy as each the conditions had been eerily comparable. Upon similarly investigation, it became determined that LG Polymers became functioning with expired permissions and licences. A Parallel may be drawn among the Bhopal and Vizag Gas leaks. Both the businesses had been permit off with confined Liability in spite of the damage triggered alevn though the range of deaths in Vizag became relatively lesser. It is to be stated that the range of deaths isn't always a figuring out element in determining absolute Liability. It in the long run comes right all the way down to imposing the Liability and the businesses taking obligation for his or her inaccurate actions.

VI. CRITICAL ANALYSIS

The first part of the analysis discusses the landmark case of *Rylands v. Fletcher*, which laid down the principle of strict liability. It then studies the essentials and exceptions to the rule of strict liability. Further, it explores the landmark case of *M.C. Mehta vs. Union of India* to understand the concept of absolute liability and then gives some insight into the essentials of the same.” In the presence of the information mentioned hereinabove, it is now easier to understand the concept of Absolute Liability being the difference of Strict Liability and its exceptions. Strict Liability is the rule which makes any person owning a hazardous or dangerous object on his land liable for any damage caused, due to the escape of such object, irrespective of the individual's intent in causing such damage or harm. Strict liability had the exceptions, stating that in case such escape occurred due to the Act of God, an act of Third Party, an act of the Plaintiff, or in pursuance of a statutory obligation, the liability would not apply.

As a result of the nameake, the individual is fully accountable for any acts resulting from the escape of a dangerous article in his or her possession. Absolute Liability, like its non-natural use of land, is the second premi'se of the 'No-Fault Liability' doctrine of tort law, with no exceptions. The law of Strict Liability was thought to be established and solid until the Bhopal Gas Leak tragedy in India in the 1980s, when the subject of Strict Liability exceptions arose. The Supreme Court of India ultimately formed an offshoot of the idea of Strict Liability, known as Absolute Liability, in the unrelated case of the Oleum Gas Leak. Culpability, with no defence or exception available to the defendant to avoid such liability. From the case of M.C Mehta v UOI, the use of just Strict Liability was a step back for the Indian Justice System. The court declared in the earlier ruling that the concept of Strict Liability is "woefully restricted," and that the second principle of Absolute Liability, which places the whole burden of proof on the defendant, was therefore the necessity of the hour. The interim ruling of strict culpability in this case, on the other hand, not only allowed the defendants to weed their way out by the escape door held open by the way of exceptions but also is in gross violation of [Section 17](#) of the NGT Act, 2010, directing the NGT to apply the principle of Absolute Liability even in the case of accidents.

VII. CONCLUSION

Approximately two centuries ago, when technical progress was almost non-existent in compared to what it is today. To provide stronger civil law remedies and to broaden the development of our own jurisprudence, we need a concept that is fair to both the perpetrator and the victim. Absolute liability is consistent with the current scenario in our country, in which we are a destination for globalisation and significant investments, and in which the nature of most businesses is hazardous. The second element of the inquiry concerns whether the idea of absolute accountability exists in India or if it has been recognised by our government. judiciary. A very important finding here is that yes to a extent their exist a principle of absolute liability and judiciary recognizes, and the principle so given by court in the case of M.C.Mehta is not merely an obiter but is an important aspect which suits our present day conditions. The word extent used above is of great significance, researcher believes that although the judicial recognition has been done, but it is not in accordance with the required level which is very much required looking at prevailing situations in our country. Also the principle of absolute liability, according to the researcher, should not pay compensation to the sufferers on the basis of the paying capacity of the industries.

¹ 8 Davis, Mary J., Time For a Fresh Look at Strict Liability for Pharmaceuticals (2019), https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3375061 9 Lior, Anat, AI Strict Liability Vis-a-Vis AI Monopolization (2020), https://papers.ssrn.com/sol3/papers.cfm?a_bstract_id=3707110 10 Tyagi, Anamika, Reiterating the Principle of Absolute Liability in Light of Oleum Gas Leakage Case (2020), https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3697451

Agreeing with the SC explanation of the very point that, it will help one to get exemplary damages and also larger the industries more the compensation can be provided to the sufferers, the results will be that if the industry is tiny, compensation will be granted to the victim based on the financial capability of the Liability, rather than the harm caused, which is the primary concept of tortious liability. Absolute previously said that the unforeseeable nature of the occurrence and the lack of mens rea might aid in the defence of a person accused with the crime. Such exceptions became obsolete as this notion evolved in tandem with the expansion of industry and society, and the concept as we know it now expanded to become what it is.

The Supreme Court's innovative and forward-thinking position in the M.C. Mehta v UOI case is exactly what India needs in terms of all laws and their applicability to the current times. Because of its application, the evolution of Absolute Liability has provided improved justice and decisions, and it must be assured that the growth of such a concept is preserved by consecutive and just court decisions. wrongdoer. According to the researcher, the element of paying capacity should be limited to major enterprises, while the others should have a limited amount of paying capacity. According to tort law, the losses sustained should be employed. In conclusion, the findings are mixed, as the first part is correct, namely, that there is a need for acknowledgment of the notion of absolute liability, and the second part is not accurate, namely, that the principle has been accepted to some extent by the judiciary. The hypothesis is dealt with in the same way, with the first portion being false and the second part being true. As a result, wider acknowledgment of the notion of absolute culpability is required in India.
