# Responsibility of Libraries and New Technology for Quality Education

Dr. Prashant S. Pagade
*Librarian, Vidarbha Arts & Commerce College, Lakhani, Dist:- Bhandara*

***Abstract:*** ***The Present paper focuses on Responsibility of College libraries in Educational improvement which has huge Significance in the today's world. College or academic library is played significant role in this rapid alerting computing period their role contains classification and assessment of information its institute of administration store room recovery and distribution to correct at right value and in exactly arrangement. The goal of academic or college libraries get of academic or college libraries get together the teaching and learning research and additional information requirement of the user. At current the online records, income help configuration of the colleges at supply distribution with the libraries at supply distribution with the libraries. The institution of E-publishing has conveyed a rebellion in magazine, Periodical donation and admission libraries instrument. Therefore, the paper explains a variety of New Technologies purpose in the College or academic libraries keyword computer, E-Resources, Internet RFID Technology.***

***Keyword: RIFD, New Technology, Quality Education, Academic Libraries keyword.***

## I. INTRODUCTION

The Present Study highlights on Responsibility of college, Libraries in Education improvement "Which has huge Significance in the today's academic development. All College libraries have to modify their facility and information resource arrangement. Todays every college libraries turns in to as amalgam decimation in spite of the information that in order is being measured as an educational and collective advantage it is a outstanding improvement that it is at the present being acquired at elevated values. Therefore building these huge libraries and collection presented in an under stable and prearranged method by using the technologies is presently the supreme dispute for all those conserved appropriate technologies is presently the Supreme dispute for all those concerned in understanding organization which comprises the invention associate communication and in order. In the Present day, we are living in the era of computer and information technology which plays incredibility fundamental responsibility in library discipline i.e. for collection, storage, organization processing and analysis of information documents files are highlighting several challenges in the occupation outstanding to application of New Knowledge, with the beginning of new technology libraries have turns into automatic which is the fundamental require towards development chased by arrangement and extra aim is towards practical libraries. The appearance of e-publications, digital libraries, internet web tool function for libraries syndicate performs guides to the additional improvement in academy libraries. The globe is, nowadays as information culture and the worldwide break connecting recognize and distinguish not is ranking consequently, the just technique is to provide the deprived the possibility to grasp is to force in additional information with computer as well as through the internet in the rising world. ICT are showing terrifying as well as cast effective superiority improvement and breach new trails for changing the method we live work study and converse. Academic libraries have to co-operate fundamental role in the lives of colleges in sustain telling leaving development. Growth of collection of such documentation is very fundamental for the users. It is acceptability to the academic libraries to offer the mandatory journalism and information to the Students, facilities and non-academic workers of the college, where they worked.

## II. AMIS AND OBJECTIVES OF THE STUDY

The Present Study with the following aims and objectives.

*1)* To explain the chief fundaments of the library donation to the leaving and growth of education Undergraduates and employees.
*2)* To Observe the Similarities and dissimilarity in advance being followed by colleges.
*3)* To revise the accomplishment of precise library policies for causal to and behind teaching and learning process.
*4)* To arrange presentation pointer to reproduce this.
*5)* To create Suggestions pointer to reproduce this vocation.

## III. NEW TECHNOLOGIES FOR LIBRARIES

There are some new technologic for libraries which can be given bellows

1) *Computer in Libraries:* The Computer is possibly a good number for helpful instrument however, developed at the moment everyone is going to use computer in everyone is going to use computer in ever increasing information in ways new extremely Soon little before. They can amass procedure, get back and distribute information very rapidly.
2) *Information and Communication Technology:* It is typically called ICT which is frequently used as a comprehensive synonym for developing teaching learning process. Other than, it is typically a further universal word that anxiety the role of united communication and scheme and audio-visual system in current information technology. It also consists of all technology. It also consist of all technological corning used to grip information and aid Communication together with computer and interest Communication middleware as well as essential Software.
3) *Internet:* The Internet is a worldwide system of unified computer network it users for the standard internet protocol (Procedure) set to provide billions of user's wide-reaching. It is a network of System which consists of millions of confidential community, educational Commerce and administration networks of limited to worldwide ring. It is connected by a wide arrangement of electronic wireless and visual networking equipment speedily development Internet situates the tendency to present the Internet capability for library staff and users. Long with library's essential services libraries are using the internet to sustain their essential purposes and services, achievements movement and orientation service, Categorization, Classification and given that admission to the internet as a self-giving service.
4) *Barcode Technology:* It can be clear as a self- restricted communication with information Prearranged in a sequence of black unreliable and colorless places between each two of them. The bars and places stand for a sequence of charities or number. These are legible only by a Scanner which sends meaning to the computer that internet such bows on and white blanks as off or Hence barcode is a series of and it's instead of characters in such a shape as can be recognized by computer only. The barcode has a tag of book attainment of exacting library and classify the book with tag
5) *Significance of College Libraries:* Libraries are supposed to be the spirit of enlightening organization it is factual that education of a college goes fine to develop information rather than only Presentation records, whether the majority of the colleges are playing appropriate role to teach its working development of knowledge. Role of Libraries has approached as a most important subject in generating to learn responsive surrounding in libraries it has been experiential that library in use into deliberation that library growth towards information with technology many build Students and group of people responsible body . It's most important responsibility is sustaining to teaching learning and research process in the college tricks. In the class, teacher is instructing the subject of focus other than student who not appreciates the idea then they come to library and explore the information on their subject. It forever educator and Learners for their teaching and Learning process Lecture also users library resource for developing their teaching activities.
6) *Library Facilities*

1) Exchange of Books with typical digital Software.
2) Book-Bank Service
3) Present Journal and Magazine to Student and Staff Members.
4) Providing Question Papers Set to Students.
5) OPAC Facility
6) Internet Facility
7) Reprography Facility
8) Library Orientation

7) *Free E- Resources*

1) Free Online Marathi Vishwakosh avaible www. Marathivishwakosh.in
2) www. Britanica .com
3) www. Doabook.org

## IV. CONCLUSION

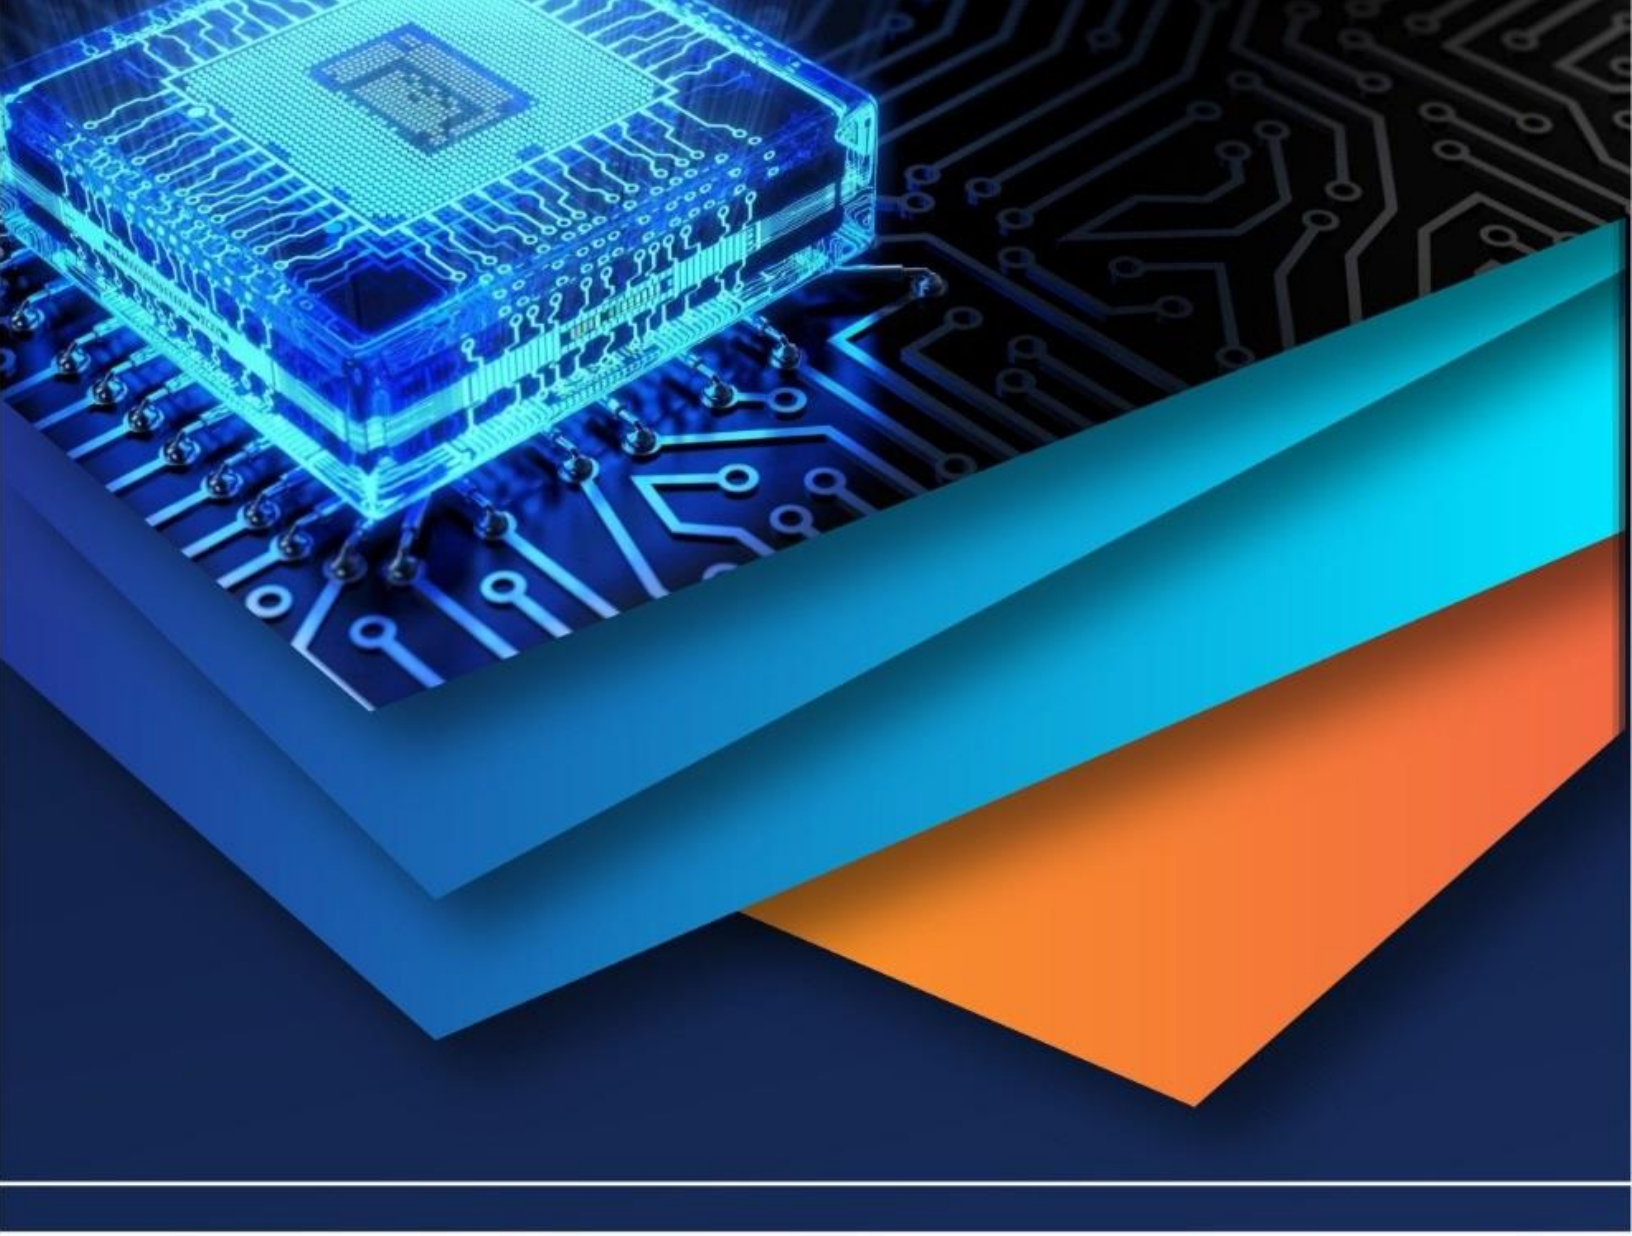

At Current there is required of well-skilled library manpower to give improved library services to teachers and students. The manpower is necessary to be skilled in new technology along with the customary abilities. An academic or college library has misprinted their figure with the function of advanced technologies. It has also established their aptitude to guide and acclimatize their responsibilities in reply to altering conditions.
