Abstract: Having the same position of the lesson to students makes them bored of learning. Especially learning a foreign languages is one of the hardest thing to do. There are various methods for changing the lesson image for the teacher to be able to attract students to her or him, and they are not always used widely in Uzbek schools or higher education institutions. Though this article, we would like to reveal the benefits of combining animations with new language atmosphere lessons until God gives us and our knowledge and outlook reach.
Keywords: teaching, animations, education, learning, interaction, accessibility, visual aids.

I. INTRODUCTION

It's evident that engaging teaching methods are crucial, especially for language learning. Introducing innovative approaches like incorporating animation can enhance the learning experience, making it more captivating and effective. Embracing these strategies could contribute positively to the evolving educational landscape in Uzbekistan.

II. DISCUSSION AND RESULTS

There are a few examples to demonstrate animations can be beneficial in language education:

1) *Visual Aids:* Animations can help to illustrate vocabulary, grammar concepts, and cultural nuances in a visually engaging way, making it easier for learners to understand and remember new language content.
2) *Contextual Learning:* Animations can provide context for language use by depicting real-life situations and scenarios, helping learners to understand how language is used in different contexts.
3) *Pronunciation Practice:* Animated characters and scenes can help learners practice pronunciation by providing clear examples of how words and phrases are spoken.
4) *Cultural Understanding:* Animations can be used to explore cultural elements such as customs, traditions, and everyday life in the target language's culture, helping learners to gain a deeper understanding of the language they are studying.
5) *Engagement:* Animated content can capture learners' attention and maintain their interest, making the language learning process more enjoyable and motivating.
6) *Storytelling:* Animations can be used to tell stories in the target language, making language learning more immersive and engaging. Learners can follow along with the animated narrative, building their comprehension and language skills through context.
7) *Interactive Learning:* Animated language learning materials can include interactive elements that allow learners to participate in activities, quizzes, and games, promoting active engagement with the language.
8) *Accessibility:* Animations can be a useful tool for learners with diverse learning styles or those who may struggle with traditional teaching methods. Visual and auditory elements in animations can cater to different learning preferences.
9) *Real-life Situations:* Animated scenarios can depict real-life situations such as shopping, traveling, or social interactions, providing practical language use examples for learners to emulate.
10) *Reinforcement:* Animations can be used as a reinforcement tool to review and practice previously learned language concepts in a fun and interactive manner.
11) *Cultural Context:* Animated language learning materials can incorporate cultural contexts and traditions, helping learners to understand the cultural nuances and customs associated with the target language.
12) *Pronunciation Practice:* Animations can demonstrate correct pronunciation of words, phrases, and sentences, allowing learners to listen and imitate the native speakers' speech patterns.

13) *Visual Vocabulary Building:* Animated visuals can help learner's associate words with images, aiding in vocabulary retention and recall.
14) *Storyboarding:* Creating animated storyboards can be a creative way for learners to practice constructing sentences and narratives in the target language, fostering their ability to express themselves in a coherent manner.
15) *Self-Paced Learning:* Animated language learning resources can be accessed at any time, allowing learners to study at their own pace and review content as needed.
16) *Personalized Learning:* Animated content can be tailored to cater to individual learning goals and preferences, providing a personalized approach to language acquisition.
17) *Multi-Sensory Engagement:* Animations engage multiple senses simultaneously, combining visual and auditory stimuli to enhance overall language learning experience.
18) *Motivation:* The dynamic nature of animations can motivate learners by making the language learning process more enjoyable and stimulating their interest in the target language.
19) *Interactive Exercises:* Animated language learning materials can incorporate interactive exercises such as quizzes, games, and simulations to reinforce language skills in a fun and engaging way.
20) *Real-life Situations:* Animations can depict real-life scenarios and conversations, helping learners to understand how the language is used in practical contexts and everyday interactions.
21) *Emotion and Expression:* Animated characters can express emotions and gestures that aid in understanding the nuances of communication, such as tone of voice, body language, and facial expressions.
22) *Accessibility:* Animated materials are often accessible across different devices and platforms, allowing learners to engage with the content from various locations and at their convenience.
23) *Reinforcement of Grammar Concepts:* Animations can visually demonstrate grammar rules and structures, making abstract concepts more tangible and easier to comprehend.
24) *Cultural Sensitivity:* Through animations, language learning resources can incorporate cultural sensitivity by portraying diverse perspectives, traditions, and customs relevant to the target language.
25) *Synchronous Learning:* Animations can be used in synchronous learning environments such as virtual classrooms or live tutoring sessions to enhance engagement through visual aids.
26) *Multimodal Learning:* By integrating text, visuals, audio, and interactive elements, animated language learning resources support multimodal learning styles and cater to a diverse range of learners' preferences.

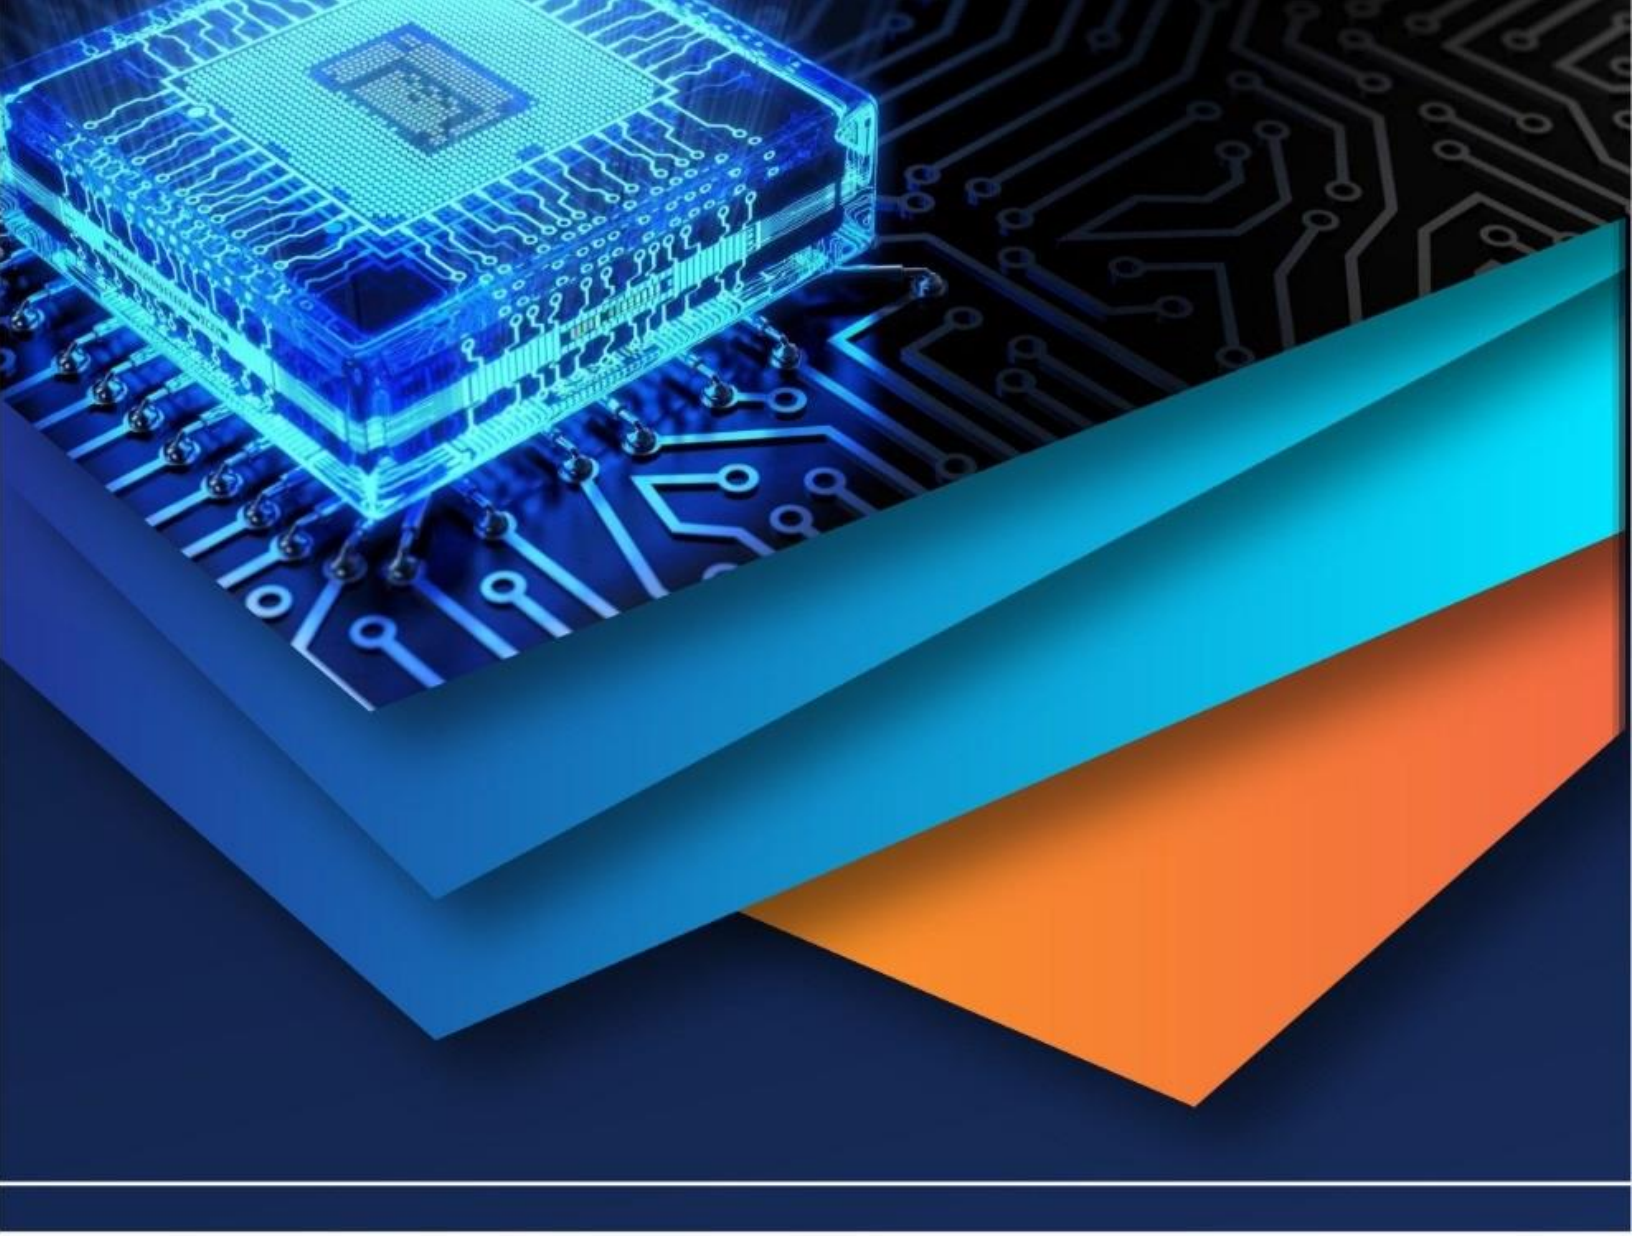

This factors collectively contribute to the effectiveness of animated materials in facilitating language acquisition while offering an engaging and dynamic learning experience for learners of all ages.

III. CONCLUSION

The goal of our article, avoiding traditional teaching, and enhancing the speech of students. This method of teaching not only beneficial for adults, but also children of kinder-garden age will not be without its benefits. In other word, in digital age we cannot attract modern children by traditional lesson methods, because they are growing up in an age of advancing technology. According to these factors above we decided on to write this article dedicated to new technique and we would like to decorate their lesson with IT technology facilities. As you can see, animations have the potential to greatly enhance the teaching of foreign languages by providing engaging visual, immersion, reinforcement, practice, and enjoyment in their language acquisition journey; auditory content that supports various aspect of language learning, from vocabulary acquisition to cultural understanding and practical application of language skill.
