**Abstract:** *The purpose of this research is to study on customer satisfaction towards Satyam traders. The descriptive research method such as survey and questionnaire method was used to collect data. Non-probability and convenience sampling method was adopted with the sample size of 120 respondents. To analyze the customers and satisfaction towards it frequency analysis and chi-square tools were used. The study shows that the organization is essential for the organization to motivation their customers to satisfied with peanuts product for achieving the organizational goals and objectives.*

**Keywords:** *Customer, Satisfaction, Quality, Peanuts product*

## I. INTRODUCTION

A customer satisfaction survey program is a burden on the organization and its customers in terms of time and resources. There is no point in engaging in this work unless it has been thoughtfully designed so that only relevant and important information is gathered. This information must allow the organization to take direct action. Nothing is more frustrating than having information that indicates a problem exists but fails to isolate the specific cause. Having the purchasing department of a manufacturing firm rate the sales and service. I used Primary data because the primary data gives a valid and relevant response from the respondents. In this study descriptive research design is used because the descriptive research design gives relevant response by the deep study of the research and so that I get proper response from the respondents. Majority of customers are satisfied with the price influence of product. Majority of customer highly satisfaction with variety of peanuts product. It was founded by my study that the female are also satisfied with the convenient location of satyam traders

## II. LITERATURE REVIEW

- 1) *Christina Boutsouki and Yorgos Zotos (2007):* This main objective behind doing this research is organic products an exploratory study. This paper attempts to provide evidence on the relatively under researched area of organics attitudes and behaviour in Greece. The finding is Greek consumers seem to be informed about environmental and health issues. They seek information about the nutritional value of food and demand more products free from chemical residues. The results confirm that health, concern for the environment, animal welfare and support of the local economy are drivers of organic consumption.
- 2) *Shahzad Khan, Syed Majid Hussain, Fahad Yaqoob (2013):* The main objective behind doing this research is focused to find what are the key success factors for fast food industry in region of Peshwar Pakistan. To find which of these factors has greater influence on consumer satisfaction, four fast food restaurants customers were targeted randomly. The study is based on the secondary data collection through examine of all the different types of literature review of fast food industry. The finding of this study is that service quality and brand are the key factors for satisfaction in fast food industry in Peshawar Pakistan.
- 3) *R. Ramachandran (2015):* The main objective behind doing this research is conceptualize the potential of glucose biscuits and Marie segments. In this study that the term is often applied in referring to geographical markets. The study is based on primary data method collection. The study concludes that from these research findings most of the consumers prefer Glucose Biscuits because of its quality and taste. Further the consumers are more aware of price and packaging. So the company should try to improve these factors so that they can improve their sales for their prolong existence and to make customers retaining.
- 4) *Jalal Hanaysha (2016):* The objective of this study is building customer satisfaction is considered to be a key priority for business success. The collected data were analysed using SPSS and structural equation modelling (SEM). The findings indicated that food quality has a significant positive effect on customer satisfaction. Moreover, the findings revealed that price fairness and physical environment have significant positive effects on customer satisfaction. These findings provide useful suggestions and guidelines for the policy makers in fast food restaurant industry and confirm the importance of the selected factors in affecting customer satisfaction.

5) *Bajrang Lal and Pankaj (August 2017)*: The main objective behind doing this research is knowledge of customer behaviour for effective marketing is very important. The prime objective of organizations is to maximize profits and to minimize cost. The study conclude that Brand Name, Colour, Taste and Packaging of Pepsi and Coca-Cola directly influence customer buying behaviour and bring about customer satisfaction. In this study is found that research studies related to customer satisfaction toward Pepsi and coca- cola have not been conducted especially, in Jind city (Haryana).

**A. Research Objective**

- 1) To study the customer satisfaction level of Satyam Traders.
- 2) To study the factors that affects customers satisfaction of Satyam Traders.
- 3) To assess the association between demographic variables and factors of customer satisfaction.

**B. Research Methodology**

Primary data has been collected through survey techniques and questionnaire method. Sample size for data collection was 110 respondents. I used this data because the primary data gives a valid and relevant response from the respondents. The type of questions I asked to my respondent by both instrument open ended and dichotomous. And the type of my instruments are structure and disguised.

**III. DATA ANALYSIS & DISCUSSION**

Descriptive research design has been used to describe and explain the research objective. Non-probability and convenience sampling techniques was used to get samples. The questionnaires were analyzed by using SPSS software. To analyze the data frequency test and chi-square test is used.

Gender	Frequency	Percent
Male	78	70.9
Female	32	29.1
Total	110	100.0
Age		
Below 18	35	31.8
21-35	61	55.5
36-50	14	12.7
Total	110	100.0
Occupation		
Employed	35	31.8
Unemployed	1	.9
Govt.	9	8.2
Private sector	3	2.7
Student	51	46.4
Other	11	10.0
Total	110	100.0
Income		
Below 20000	25	22.7
20000-35000	23	20.9
35000-50000	31	28.2
Above 50000	31	28.2
Total	110	100.0
How frequent do you use Satyam traders product (Peanuts)?		
Once a month	40	36.4
Twice a month	13	11.8
Thrice a month	18	16.4
More than thrice a month	15	13.6
On the need basis	24	21.8
Total	110	100.0

They are two genders basically where male are 70.9% and females are 29.1% are visited to satyam traders and use the peanuts product of satyam traders. And they are satisfied with the peanuts product, Ration of male customers are significantly higher than the ration of female customers.

There are 31.8% respondents are below 18, 55.5% respondents in age between 21-35, 12.7% respondents are in group of 36-50 years.

From the respondents 31.8% are employed, unemployed are 9% , government employees are 8.2%, 2.7% are working in private sector, 46.4% are students, others are 10% where from house wife, etc. are visited to satyam traders and use the peanuts product of satyam traders.

There are four categories in annual income, 22.7% income of below 20000, 20.9% income of 20000-35000 income per year, 28.2% income of 35000-50000, and 28.2% income above 50000.

36.4% customer's use the peanuts once in a month, 11.8% customers are use the peanuts twice in a month, 16.4% persons are use the peanuts product thrice in a month, 13.6% customers are use the peanuts product more than thrice in a month, 21.8% persons are used the peanuts product on the need basis.

A. Chi-Square shows difference between Quality of product and Income

Demographic factor	Quality of Product					Pearson Chi-Square		
	5	4	3	2	1	Z	Df	p-value
Income								
Below 20000	19	3	1	2	0	14.107	12	0.294
20000-35000	14	9	0	0	0			
35000-50000	22	5	2	1	1			
Above 50000	21	9	0	0	1			

Tab. 4.9 Represent Chi-Square shows difference between Quality of product and Income

- 1)  $H_0$ = There is no significant association between demographic variables and Quality of product.
- 2)  $H_1$ =There is significant association between demographic variables and Quality of product.
- a) Interpretation: Since p value is 0.294 which is greater than 0.05 null hypothesis is accepted & alternative hypothesis is rejected at 5% level of significance. Hence concluded that there is no association between Income and overall satisfaction towards Satyam Traders. Based on the row and column percentage, All customers are totally satisfied with Satyam Traders.

B. Chi-Square shows the gap between Variety of product and Age

Demographic factor	Variety of Product					Pearson Chi-Square		
	5	4	3	2	1	z	Df	p-value
Age								
Below 20	23	9	1	2	0	4.937	8	.764
20-35	33	23	1	2	2			
35-50	10	4	0	0	0			
Above 50	0	0	0	0	0			

Tab. 4.10 Represent Chi-Square shows the gap between Variety of product and Age

- 1)  $H_0$ = There is no significant association between demographic variables and Variety of product.
- 2)  $H_1$ =There is significant association between demographic variables and Variety of product.
- a) Interpretation: Since p value is 0.764 which is greater than 0.05 null hypothesis is accepted & alternative hypothesis is rejected at 8% level of significance. Hence concluded that there is no association between Age and overall satisfaction towards Satyam Traders.

C. Chi-Square shows the gap between Convenient location and Gender

Demographic factor	Convenient Location					Pearson Chi-Square		
	5	4	3	2	1	z	Df	p-value
Gender								
Male	36	35	6	1	0	2.236	3	.525
Female	19	12	1	0	0			

Tab. 4.11 Represent Chi-Square shows the gap between Convenient location and Gender

- 1)  $H_0$  = There is no significant association between demographic variables and Convenient Location.
- 2)  $H_1$  = There is significant association between demographic variables and Convenient Location.
- a) *Interpretation:* Since p value is 0.525 which is greater than 0.05 null hypotheses is accepted & alternative hypothesis is rejected at 5% level of significance. Hence concluded that there is no association between gender and overall satisfaction towards Satyam Traders. Based on the row and column percentage, the Male gender is highly satisfied with Satyam Traders.

#### IV. FINDING

Gender wise classification reveals that 70.9% of respondent are male and 29.1% are female. Age wise classification reveals that 31.8% of customers belonged to age group of below 18 another 55.5% are in group of 20-35, 12.7% are in the group of 35-50 and 0.00% are in the group of above 50 years. Income wise classification reveals that 22.7% income of customers belonged to income of below 20000, another 20.9% are income of 20000-35000, and 28.2% are in the income of 35000-50000, 28.2% of in the income above 50000. Majority of customers are satisfied with the price influence of product. Majority of customer highly satisfaction with variety of peanuts product. It was founded by my study that the female are also satisfied with the convenient location of satyam traders.

#### V. CONCLUSION

It is impossible to give a limit to a boundary within the customer satisfaction level. Level of satisfaction differs from person to person, as no two human beings are the same but there are some common factors that can determine the overall level of satisfaction of the customers. After the data analyzed, the all customers are mostly satisfied and highly satisfied with the peanuts product of satyam traders. And the all customer's responses are positive. This dimension of satisfaction depends on different factors such as age, gender, occupation, income and number of monthly use the peanuts product of satyam traders. All customers are satisfied with location also and the staff of satyam traders is too much good responsiveness with their customers.
