Abstract: Easy Export offer all the data regarding exportation of product. [1]This simple Export application cover all the essential step tends to satisfy exportation easily. For developing countries foreign trade may play major roles in economic development. [3]The focus of economic development ought to be on supporting innovation, increasing prosperity and technology within the country. Therefore, the importance of import and export potency in economic development could be a key issue and will be leading factors to economic development. [2]This application approaches agricultural field in exportation field with all essential data and general awareness. Easy Export application offer all the information's like HSCode, SGS scrutiny, ECGC etc. easy Export is the application supported front in ASP.Net framework and Backend with SQL Server. ASP.Net Framework is easy to handle and manages all the factors of this application whereas SQLServer offer robust database support to the present application.

Keywords: Exportation; Asp.net; SqlServer; ECGC; SGS Inspection

I. INTRODUCTION

In general, Exportation field is the main supply in Indian Economy, whereas Agricultural field offer robust support in Indian Economy. therefore, if agricultural field play a task in Exportation field then Indian Economy will be grow quick. Easy Export provides this platform wherever agricultural field merges in exportation field. there's no country within the world these days that produce all the commodities it desires. Each country, therefore, tries to provide those commodities during which it's comparative advantage. It exchanges a part of those provides with the commodities created by alternative countries relatively more resourcefully. For the last twenty years International trade has grownup vastly throughout around the world and remains continuing its upward trend. The fact that the globe is understood because the global village and therefore, the trade between the countries is expanding quickly and the fewer countries are dominating over International trade, there are still lots of opportunities for manufacturers and producers discovering and obtaining advantages from new markets

A. Related Work

Easy Export application works on agricultural product like Rice. The essential objective of this application is to supply conceptual and sensible knowledge of import and Export of products in all over world. Easy Export can offer HSCode of each and every product, that is common {for every|for each} material in all over world also it'll offer number of promotion council that changed on every product and provide SGS scrutiny before material came across the fort. Easy Export Works on two main modules that are Administrator and exporter. Administrator can offer all data associated with exportation of product to product. Exporter gets all the essential and necessary information available during this application. it's various masters that have individual functionality. Export promotional Councils(EPC) are authorities that are basically promoting, supporting and assisting companies in entering the international markets and realizing their resources. They conjointly offer guidance and help to the exporters. In legal terms, export promotional councils are non-profit organization registered as a company or society. Each export promotional council is liable for his specific group of products. As per the Foreign trade policy of India, anyone who either need to acquire any license to import export restricted or other similar classes of goods or to avail any export related benefit or scheme is liable to register for Registration cum Membership Certificate(RCMC). Export promotional councils offer various advantages to the registered exporters. And thus, plays a big role for any exporter in India. The basic objective of Export Promotion Councils is to develop and promote the exports of the nation. each Council is in charge of the promotion of specific group of projects, products, and services. The council helps in sponsoring the development of export-related industries. They assist in diversifying the productive sector of the nation and to foster market oriented, private sector-economy via market oriented export goods development. Export Credit Guarantee Corporation is a central governments undertaking body to supply credit guarantee export payment, if the customer defaults in making payment. Easy Export application provides all agricultural product information. During this application firstly work on Rice product. In a agricultural field rice is the top most product that has variable quality and large quantity of amount in India. Now-a-days most exported rice is Sella rice. also the largest rice exporter country in all over world is India. Top rice exporter in India is KRBL limited, whereas, Most Exported brand of rice is CUP brand.

II. TECHNOLOGIES USED

A. ASP.NET

ASP.Net is the successor of Microsoft ASP (Active Server Pages), however it's developed to be a lot of powerful than ASP. It may be used to build dynamic websites and web based mostly distributed applications, respond to information submitted by the user from the HTML form, and access to the data or database, then come back the results to the browser. ASP.NET is a development platform provided by .NET Framework and options a totally object-oriented programming model, which has an event-driven, control-based architecture that encourages code encapsulation and utilize. When coding ASP.NET applications, programmers have access to categories within the .NET Framework. ASP.NET consumes terribly massive in terms of memory usage and execution time, due in a very long code path. For web-based applications, these limitations would be a significant drawback, as a result of on the web, application could also be extended to the thousands of users per second. Memory usage may additionally become a drag on the web server. On the opposite aspect, clearly the benefits of ASP.NET rely on its simple style and implementation. This is often the dream of object-oriented programming: Language versatile and support to complicated object-oriented features. During this sense, it can be ready to interoperate with the existing skills of programmer.

B. SQL 2008 Server Database

Microsoft SQL Server is a database management and analysis system for e-commerce, line-of-business, and information storage solutions, it's a robust and easy-to-operate back-end management system, progressively favored by the bulk of database users. A lot of and additional development tools are supplied with SQL Server interface. SQL Server is a relational database management system, originally developed by three companies, Microsoft, Sybase and Ashton-Tate together. The primary version was OS/2, launched in 1988. When the release of Windows NT, Microsoft and Sybase SQL Server developers compound ways that Microsoft moved SQL Server to Windows NT system, and NT on the development and promotion of SQL Server Windows NT version. SQL Server cannot only be applied to little and medium-sized management, and also the establishment of a distributed relational database, however conjointly to develop a desktop database. In fact, the essential structure of the SQL Server database process uses relational database model. SQL Server Enterprise Manager is a key management tool for SQL Server, and complies with the MMC standard user interface, permitting users to define the instance of SQL Server cluster. The SQL Server additionally supports functions like registering individual servers the cluster, configuring all SQL Server choices for every registered server, making, and managing all SQL Server database objects, log-ins, users and permissions in for every registered server, and shaping and executing all SQL Server administrative tasks on every registered server.

III. SYSTEM ANALYSIS

Import and Export of Product must undergo various steps. Rice is a significant component within the exports from India all these years. Within the year 1999, around 25th of the overall agricultural exports in India were rice. Countries like Myanmar, Chine, Japan, and Vietnam, etc. are also a number of the rice production giants. However, the ever-growing demand for the rice across the world gives a decent scope for the rice export business from India. To export rice from India following points have to be compelled to be contemplate.

A. Primary Requirements

1) Get Import-Export code from DGFT
2) Apply for RCMC certificate with Agricultural and Processed Food products Export Development Authority (APEDA)
3) Get Phyto-Sanitary Certificate issued by Plant Quartine department needed at the time of customs Clearance

B. Export policy of Rice

Rice of seed quality is restricted to exports. Apply for License with DGFT (ANF 2B PART-A application form for Import of Restricted things (Para 2.37 of HBP.V-I) out there on DGFT website.

Process of exporting Rice from India. Below steps are essential for beginning rice export business in India.

1) *Registered A Firm-* you need to register an organization so as to export from India. Company registration method is extremely easy and will take around twenty days. After registration, you have got to apply for company PAN. You will get your company PAN in less than 40 days. It's counseled that you simply add EXPORTERS in your company name as a result it'll make it clear to your international buyer that they're handling right company/person. • GET IEC (Import Export Code)- IEC is required for export of any product from India.

2) *Choose Your Target Country:* Select your target country wherever you'll export your right. It's counseled that you simply ought to notice your potential consumers in high 30 countries.

3) *Find Buyers:* it's the most vital part in any export business that how to notice potential buyers in international market? Some tips for locating potential consumers are through contacting your relatives in that country, export trade fairs and expos, through an online portal like Alibaba and India mart, social media advertising, promotion of your website, etc. In legal terms, export promotional councils are non-profit organization registered as an organization or society. Every export promotional council is responsible for his specific cluster of product.

As per the Foreign trade policy of India, any an individual who either need to acquire any license to import export restricted or alternative similar classes of products or to avail any export connected profit or scheme is liable to register for Registration cum Membership Certificate(RCMC).

Export promotional councils offer numerous benefits to the registered exporters. And thus plays a major role for any exporter in India.

C. System Architecture

Figure 1 describes system architecture and its detailed working procedure.

Figure 1: Flowchart of Easy Export Application

The side system provides a graphical user interface (GUI) within the kind of website where managers of the system act with the application whereas the backend Consists of SQL server database so as to extract product information from system. The extracted information of product is keep in SQL server database.

Export promotional Councils(EPC) are authorities that are essentially promoting, supporting and assisting companies in getting into the international markets and realizing their resources. They additionally offer guidance and assistance to the exporters.

The basic objective of Export Promotion Councils is to develop and promote the exports of the nation. Every Council is in the charge of the promotion of specific cluster of projects, products, and services. The council helps in sponsoring the development of export-related industries. They assist in diversifying the productive sector of the nation, and to foster market orienting, private sector-economy via market oriented export goods development.

Export Credit Guarantee Corporation is a central government undertaking body to supply credit guarantee export payment, if the buyer defaults in making payment.

Dun & Bradstreet provides information regarding businesses through a global commercial database. Dun & Bradstreet manages business information and helps firms communicate their creditworthiness.

D. Implementation

Working of the planned system is as follows: The backend system consists of SQL server database. SQL Server is the database system that manage data and analysis system for easy Export system; it's powerful and easy-to-operate back-end management system. During this application admin of easy Export has only rights to register overall exporters that are belong to the current application. During this application storage scheduling center give all available information of product. This information keep in backend information system. This system operating under Management of all operations related to exportation of product.

Easy Export System gathers all the information in one application that used to be simple and user friendly for the exporter. Each and every method has its own functionality, therefore this application provides all these things. HSCode that is unique code of each product that has utilized in all over the world. in this application to get HSCode has one master from where user can get it easily.

In this application there are many masters for all the processes ECGS master for obtaining ECGS simple throughout the insurance. also Export Promotional Councils master which might be give basically promoting, supporting and assisting companies in coming into the international markets and realizing their resources.

IV.CONCLUSIONS

There is no doubt that in any marketing there's a motive towards profit involved and at an equivalent time the marketing is to be supported certain values, principles and philosophies such as offering simply and fair costs to the farmers who toil hard to till.

Bringing necessary reforms in addition to proper value discovery mechanism through regulated market system can help streamline and strengthen agricultural marketing.

This application will definitely fulfil all the requirements for the every exporter, so that he should get correct and efficient information of every exporting product.
