E-Commerce relates to the site of the merchant, who offers items or administrations specifically to the customer from the entrance employing a advanced shopping cart or advanced shopping wicker container framework and permits installment through credit card, charge card or electronic support exchange installments. E-Commerce is the development of commerce onto the World Wide Web (WWW). E-Commerce encourages unused sorts of data based trade forms for coming to and association with clients. It can too diminish costs in overseeing orders and association with a wide extend of providers and exchanging accomplices. For creating nations like India, E-Commerce offers significant openings. Electronic commerce or E-Commerce alludes to a wide run of online commerce exercises for items and administrations. It moreover relates to “any shape of trade exchange in which the parties connected electronically instead of by physical trades or coordinate physical contact.” E-Commerce is the utilize of electronic communications and advanced data handling technology in commerce exchanges to make, change and rethink connections for esteem creation between or among organizations and between organizations and people. Nowadays E-commerce in Indian society has gotten to be an indispensably portion of existence . Availability to E-commerce stages is not a benefit but rather a need for most individuals, especially within the urban ranges.

II. OBJECTIVES OF THE STUDY

- A. To consider the concept of E-commerce.
- B. To analyze the display patterns of E-commerce in India.
- C. To think about the different challenges confronted by E-business players in India.
- D. To consider the prospects of E-commerce in India..

III. CONCEPT OF E-COMMERCE IN INDIA

- 1) **Multi Product E-Commerce:** A few web entrances give nearly all categories of products and administrations in a single location; they are focusing on clients of each conceivable item or benefit. Indian E-Commerce entrances give products and administrations in a assortment of categories like attire and embellishments for men and ladies, wellbeing and excellence items, books and magazines, computers and peripherals, vehicles, collectibles, program, shopper gadgets, family machines, adornments, audio/video excitement products, blessing articles, genuine bequest and administrations, trade and openings, business, travel tickets, marriage etc.

- 2) *Single Product E-Commerce*: A few Indian entries / websites bargain in a specialized field. Illustrations: In automobiles, the entrances are <http://www.indiacar.com> and <http://www.automatindia.com>, on these destinations ready to purchase and offer four wheelers and two wheelers unused as well as ancient vehicles online. A few of the administrations they give are car inquire about and audits, online assessment, specialized determinations, vehicle protections, vehicle back, merchant locator etc. In stock and offers markets a few of the destinations are <http://www.equitymaster.com>, <http://www.5paisa.com>. A few of the administrations advertised to enrolled individuals are online buying or managing of stocks and share, advertise investigation and inquire about, company data, comparison of companies, inquire about on value and shared reserves, following advertise patterns etc. In genuine domain, the entries like <http://www.indiaproperties.com>.

IV. TYPES OF E-COMMERCE

The major different types of E-commerce are as follows:

- 1) *Business to Business (B2B)*: Trade to Commerce E-commerce alludes to the total range of E-commerce that can happen between two organizations B2B E-commerce incorporates acquiring and acquirement, provider administration, stock administration, channel administration, deals exercises, installment management, and benefit and bolster.
