Abstract: ***The charity online site is defined as a non-profit organization that focuses primarily on doing all non-profit activities for community reform.***
The charity online site also refers to an initiative that provides assistance to people in need through work in the relief of the poor by raising the necessary funds and product from the public to needy groups.
The service of the poor We in the era of technology The establishment of this site increases the enthusiasm and encourages people to help the poor and look at this category and help them and their satisfaction and their choice of clothes and shoes that fit their sizes and admiration.
The expected results online charity site the service of the poor and increases the enthusiasm of people to help the poor. The spread of the Internet in the world changed the regular donation, where the donation through the Web is no less important than the old methods Today Internet users are able to donate to the charity online more easily.
Keywords: Aid Digitization, Charity, ICT, Non Governmental Organization, Religious Donation Platform, Social Network

I. INTRODUCTION

The spread of the Internet in the world to change the regular donation, where the donation through the Web is no less important than the old methods.
Today Internet users are able to donate to charity online more easily. The charity is defined as a non-profit organization that focuses primarily on doing all non-profit activities for community reform. The charity online site is defined as a non-profit organization that focuses primarily on doing all non-profit activities for community reform.
A sum of money raised for humanitarianism and social well- being for charitable, educational, religious or other activities serving the mass population is a form of donation. Most major religions support donation as a demonstration of faith. Oftentimes, individuals are willing to make donations for religious causes like building religious foundations, infrastructures, supporting an orphan child or to help the people in need.

II. LITERATURE SURVEY

There are several grounds why people contribute to charity projects and other forms of aid . With the increasing use of mobile technology, it is getting effortless for any organization to collect funds online through mobile applications rather than collecting it physically. Hence, online mobile fundraising systems are being developed.
For developing online fundraising applications, emphasis should be given on proper website design which will provide an easily interacting plat- form for users to donate . In online donation systems trust is a vital issue. Any organization or individual asking for help needs to be verified properly.Hammelburger and Yitzchok proposed a system to create a platform for users to find honest incorruptible organizations to donate to. In study the paper focuses on financial transactions and also security issues involved with transactions.
[1]The charity is defined as a non-profit organization that focuses primarily on doing all non-profit activities for community reform.
[2]This paper proposes a donation system to overcome these obstacles by developing a mobile application. Additionally, this proposed system aims to make it easier for both educated or uneducated people to donate and overcome the hurdles of donation in the current system.
[3]Using an e-Scholarship System was designed and implemented in order to allow students of Niger state indigene across the country apply for scholarship online with the Niger State Scholarship Board.
[4]This paper proposes an IoT-based system where rice stocks in orphanages can be detected by Raspberry pi which is connected to sensors, data information from raspberry-pi connected to the network that can be accessed and monitored by mobile applications.

IV. CONCLUSION

Undoubtedly this application will overcome the existing problems of collecting and making donations. Moreover, this system also allows a diverse set of features which are extremely vital such as language selection, in app communication, map integration, maintaining donation records, Enhanced security measures, donation goal bar, help post notifications and various customization which are immensely desired by end users.
